March 4, 2004 – Introduced by Committee on Natural Resources. Referred to Committee on Natural Resources.

AN ACT to repeal 281.17 (1); to amend 23.11 (5), 281.35 (1) (a), 281.35 (1) (b) 2.,

281.35 (4) (a) 2., 281.35 (4) (b) (intro.), 293.65 (3) and 299.05 (2) (b); and to

create 20.370 (4) (cg), 20.370 (4) (ch), 20.370 (6) (eg), 281.34 and 281.35 (4) (a)

2m. of the statutes; relating to: regulation of high capacity wells, notification

of well construction, groundwater quantity management, granting

rule-making authority, and making appropriations.

## Analysis by the Legislative Reference Bureau

## High capacity wells generally

Current law prohibits a person from constructing or operating one or more wells on one property that have the capacity to withdraw a total of more than 100,000 gallons of water a day (high capacity well) without the approval of the Department of Natural Resources (DNR). DNR must disapprove a high capacity well or impose conditions relating to location, depth, pumping capacity, rate of flow, and ultimate use to ensure that the water supply of a public water utility will not be impaired by the well. The law also generally requires DNR to provide in its approval for a high capacity well that a person may not use water withdrawn from the well to produce bottled drinking water unless DNR approves the use of the well for that purpose. Additional standards apply only to wells that result in a water loss averaging more than 2,000,000 gallons per day in any 30-day period. Water loss is the loss of water

from a water basin because the water is being diverted into a different basin, is being incorporated into a product, or for some other reason is not being returned to the original water basin.

This bill modifies the law relating to approvals of certain high capacity wells, although it retains the requirement that DNR ensure that a high capacity well does not impair the water supply of a public water utility. The bill also does not change the standards that apply under current law to wells that result in a water loss averaging more than 2,000,000 gallons per day in any 30-day period. The bill eliminates the requirement that DNR provide in its approval for a high capacity well that a person may not use water withdrawn from the well to produce bottled drinking water unless DNR approves the use of the well for that purpose.

#### Environmental review

Current law requires state agencies to prepare environmental impact statements for major actions significantly affecting the environment. DNR, like other agencies, has promulgated rules specifying the processes it will use to review the actions that it takes, such as considering applications for various approvals, to determine when it must prepare environmental impact statements. Current law authorizes DNR to require an applicant for a permit or other approval to submit an environmental impact report if the area affected exceeds 40 acres or the estimated cost of the project exceeds \$25,000.

The bill requires DNR to use the environmental review process in its rules that is applicable to an action that has the potential to cause significant environmental effects or to an action that normally does not have the potential to cause significant environmental effects when it reviews an application for a high capacity well that is located in a groundwater protection area, that has a water loss of 95 percent of the amount of water withdrawn, or that may have a significant environmental impact on a spring. The bill also authorizes DNR to require an applicant for approval of a high capacity well to submit an environmental impact report.

## High capacity wells in groundwater protection areas

Under the bill, a groundwater protection area is an area within 1,200 feet of a body of water identified by DNR as being an outstanding or exceptional resource water, other than a trout stream, or within 1,200 feet of a stream identified by DNR as being a class I or class II trout stream, other than a trout stream that is a farm drainage ditch with no prior stream history. Examples of outstanding or exceptional resource waters include wild and scenic rivers.

Under the bill, if DNR determines that an environmental impact report must be prepared for a proposed high capacity well located in a groundwater protection area, DNR generally may not approve the high capacity well unless it includes in the approval conditions that ensure that the well does not cause significant environmental impact. The bill makes an exception from this restriction for a high capacity well that is a water supply for a public water utility if DNR determines that there is no other reasonable alternative location for a well and DNR includes in the approval conditions that ensure that the environmental impact of the well is balanced by the public benefit of the well related to public health and safety.

### High capacity wells with high water loss

Under the bill, if DNR determines that an environmental impact report must be prepared for a proposed high capacity well with a water loss of more than 95 percent of the amount of water withdrawn, DNR may not approve the high capacity well unless it includes in the approval conditions that ensure that the well does not cause significant environmental impact.

## High capacity wells that may affect a spring

Under the bill, if DNR determines that an environmental impact report must be prepared for a proposed high capacity well that may have a significant environmental impact on a spring, DNR generally may not approve the high capacity well unless it includes in the approval conditions that ensure that the well does not cause significant environmental impact. The bill makes an exception from this restriction for a high capacity well that is a water supply for a public water utility if DNR determines that there is no other reasonable alternative location for a well and DNR includes in the approval conditions that ensure that the environmental impact of the well is balanced by the public benefit of the well related to public health and safety.

## Modifying and rescinding approvals

The bill authorizes DNR to modify or rescind the approval for a high capacity well, whether issued before or after this bill takes effect, if the high capacity well or the use of the high capacity well does not conform to the standards and conditions applicable to the approval of the well.

## Mitigation in groundwater protection areas

The bill requires DNR to administer a program to mitigate the effects of wells constructed in groundwater protection areas before this bill takes effect. Mitigation may include abandonment of wells, replacement of wells at different locations, and management strategies. Under the program, DNR may order the owner of a well to undertake mitigation but only if DNR provides funding for the full cost of the mitigation.

## Groundwater management areas

The bill requires DNR to identify two groundwater management areas by rule. One would be centered in Brown County and the other centered in Waukesha County. DNR is to identify these groundwater areas by first determining the areas in which the level of water in a well placed in the aquifer would be 150 feet lower than the level would have been if no groundwater had been pumped from the aquifer. A groundwater management area consists of the entire area of each city, village, and town at least a portion of which is within the area with the lowered well water level.

The bill requires DNR to assist local governmental units in groundwater management areas by providing advice, incentives, and funding for research and planning related to groundwater management.

The bill creates a committee, called the Groundwater Quantity Committee, consisting of members, appointed by the governor, the speaker of the assembly, and the senate majority leader, representing industrial, agricultural, environmental, and municipal interests and the secretary of natural resources or the secretary's

designee. The bill requires the Groundwater Quantity Committee to report to the legislature, no later than December 31, 2006, recommendations for legislation to address groundwater issues in groundwater management areas and other areas in the state in which the withdrawal of groundwater adversely affects the availability of groundwater for use or adversely affects water quality. If the Groundwater Quantity Committee fails to issue the report on time, the bill requires DNR to promulgate rules to address the management of groundwater in groundwater management areas using authority that DNR has under current law.

The bill also requires the Groundwater Quantity Committee to review the implementation of the provisions of this bill and to report to the legislature, no later than December 31, 2007, the results of this review and recommendations for changes in the regulation of high capacity wells.

### Notification of well construction, fees

The bill requires a landowner to notify DNR of the location of a well that is not a high capacity well before construction of the well begins. The bill requires a landowner providing this notice to pay a fee of \$50.

The bill requires a person applying for approval of a high capacity well to pay a fee of \$500.

## Research and monitoring

The bill requires DNR to conduct research and monitoring related to the interaction of groundwater and surface water, characterization of groundwater resources, and strategies for managing water.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

# The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

1	•	<b>SECTION 1.</b> 20.005 (3) (schedule) of t	he statu	tes: at t	he appropriate	place, insert

8	(ch)	Groundwater quantity research	PR	В	-0-	-0-

Τ.	<b>SECTION 2.</b> 20.370 (4) (cg) of the statutes is created to read:
2	20.370 (4) (cg) Groundwater quantity administration. From the general fund,
3	from the moneys received under s. 281.34, the amounts in the schedule for the
4	administration of the program under s. 281.34.
5	<b>Section 3.</b> 20.370 (4) (ch) of the statutes is created to read:
6	20.370 (4) (ch) Groundwater quantity research. Biennially, from the general
7	fund, from the moneys received under s. 281.34, the amounts in the schedule for
8	groundwater research and monitoring under s. 281.34 (10).
9	SECTION 4. 20.370 (6) (eg) of the statutes is created to read:
10	20.370 (6) (eg) Groundwater mitigation and local assistance. All moneys
11	received under s. 281.34 not appropriated under sub. (4) (cg) or (ch) for mitigation
12_	under s. 281.34 (8) (d) and funding to local governmental units under s. 281.34 (9)
13	(b).
14	Section 5. 23.11 (5) of the statutes is amended to read:
15	23.11 (5) The department may require an applicant for a permit or statutory
16	approval which the department, by order, may grant, to submit an environmental
17	impact report if the area affected exceeds 40 acres or, the estimated cost of the project
18	exceeds \$25,000, or the applicant is requesting approval under s. 281/34 for a high
19	capacity west. 5-18 AA
20	Section 6. 281.17 (1) of the statutes is repealed.
21	<b>Section 7.</b> 281.34 of the statutes is created to read:
22	281.34 Groundwater withdrawals. (1) Definitions. In this section:
23	(a) "Groundwater protection area" means an area within 1,200 feet of any of
24	the following:

1. An outstanding resource water identified under s. 281.15 that is not a trout	
stream.	
2. An exceptional resource water identified under s. 281.15 that is not a trout	
stream. 6-5 AA	
3 A class I or class II trout stream, other than a class I or class II trout stream	
that is a farm drainage ditch with no prior stream history, as identified under sub.	
(8) (a).	
(b) "High capacity well" means a well that, together with all other wells on the	
same property, has a capacity and rate of withdrawal of more than 100,000 gallons	
per day.	
(c) "Local governmental unit" means a city, village, town, county, town sanitary	
district, utility district under s. 66.0827 that provides water, public inland lake	
protection and rehabilitation district that has town sanitary district powers under	
s. 33.22 (3), joint local water authority created under s. 66.0823, or municipal water	
district under s. 198.22.	
(d) "Owner" means a person who owns property on which a well is located or	
proposed to be located or the designated representative of such a person.	
(e) "Potentiometric surface" means a measure of pressure of groundwater in an	
aquifer based on the level to which groundwater will rise in a well placed in the	
aquifer. $(e-22\sqrt{\beta_1}A())$	
(f) "Spring" means an area of concentrated groundwater discharge occurring	
at the surface of the land that results in a furrent of flowing water with flows of a	
minimum one cubic foot per second at least 80 percent of the time.	
(g) "Water loss" means a loss of water from the basin from which it is withdrawn	
	2. An exceptional resource water identified under s. 281.15 that is not a trout stream.  3. A class I or class II trout stream, other than a class I or class II trout stream that is a farm drainage ditch with no prior stream history, as identified under sub.  (8) (a).  (b) "High capacity well" means a well that, together with all other wells on the same property, has a capacity and rate of withdrawal of more than 100,000 gallons per day.  (c) "Local governmental unit" means a city, village, town, county, town sanitary district, utility district under s. 66.0827 that provides water, public inland lake protection and rehabilitation district that has town sanitary district powers under s. 33.22 (3), joint local water authority created under s. 66.0823, or municipal water district under s. 198.22.  (d) "Owner" means a person who owns property on which a well is located or proposed to be located or the designated representative of such a person.  (e) "Potentiometric surface" means a measure of pressure of groundwater in an aquifer based on the level to which groundwater will rise in a well placed in the aquifer.  (f) "Spring" means an area of concentrated groundwater discharge occurring at the surface of the land that results in a turnent of flowing water with flowe of a minimum water with flower of a minimum water with flower of a minimum

as a result of interbasin diversion or consumptive use or both.

25

-25

a spring.

(h) "Well" means any drillhole or other excavation or opening deeper than it is 1 2 wide that extends more than 10 feet below the ground surface and is constructed for 3 the purpose of obtaining groundwater. (2) APPROVAL REQUIRED FOR HIGH CAPACITY WELLS. An owner shall apply to the 4 department for approval before construction of a high capacity well begins. No person may construct or withdraw water from a high capacity well without the approval of the department under this section or under s. 281.17 (1), 2001 stats. An owner applying for approval under this subsection shall pay a fee of \$500. (3) Notification required for other wells. An owner shall notify the 10 department of the location of a well that is not a high capacity well before construction of the well begins. An owner notifying the department under this 11 12 subsection shall pay a fee of \$50. (4) Environmental review /The department shall review an application for 13 14 approval of any of the following using the environmental review process in its rules promulgated under s. 1.11 applicable to an action that has the potential to cause **75**\_ significant environmental effects and that may involve unresolved conflicts in the 16 use of available resources on to an action that normally does not have the potential 17 to cause significant environmental effects, normally does not significantly affect 18 energy usage, and normally does not involve unresolved conflicts in the use of 19 20 available resources: (a) A high capacity well that is located in a groundwater protection area. 21 2 . (b) A high capacity well with a water loss of 95 percent of the amount of water  $\frac{22}{2}$ 23 withdrawn.

3.4 A high capacity well that may have a significant environmental impact on

¥

department determines that a proposed high capacity well may impair the water supply of a public utility engaged in furnishing water to or for the public, the department may not approve the high capacity well unless includes in the approval conditions, which may include conditions as to location, depth, pumping capacity, rate of flow, and ultimate use, that will ensure that the water supply of the public utility will not be impaired.

- (b) Groundwater protection area. 1. Except as provided in subd. 2., if the department determines, under the environmental review process in sub. (4), that an environmental impact report under s. 23.11 (5) must be prepared for a proposed high capacity well located in a groundwater protection area, the department may not approve the high capacity well unless it includes in the approval conditions, which may include conditions as to location, depth, pumping capacity, rate of flow, and ultimate use, that ensure that the high capacity well does not cause significant environmental impact.
- 2. Subdivision 1. does not apply to a proposed high capacity well that is located in a groundwater protection area and that is a water supply for a public utility engaged in supplying water to or for the public, if the department determines that there is no other reasonable alternative location for a well and includes in the approval conditions, which may include conditions as to location, depth, pumping capacity, rate of flow, and ultimate use, that ensure that the environmental impact of the well is balanced by the public benefit of the well related to public health and safety.
- (c) High water loss. If the department determines, under the environmental review process in sub. (4), that an environmental impact report under s. 23.11 (5)

LRB-4400/1 RCT:wlj:pg **SECTION 7** 

### **ASSEMBLY BILL 926**

L

N

must be prepared for a proposed high capacity well with a water loss of more than 95 percent of the amount of water withdrawn, the department may not approve the high capacity well unless it includes in the approval conditions, which may include conditions as to location, depth, pumping capacity, rate of flow, and ultimate use, that ensure that the high capacity well does not cause significant environmental impact.

- (d) Impact on a spring. 1. Except as provided in subd. 2., if the department determines, under the environmental review process in sub. (4), that an environmental impact report under s. 23.11 (5) must be prepared for a proposed high capacity well that may have a significant environmental impact on a spring, the department may not approve the high capacity well unless it includes in the approval conditions, which may include conditions as to location, depth, pumping capacity, rate of flow, and ultimate use, that ensure that the high capacity well does not cause significant environmental impact.
- 2. Subdivision 1. does not apply to a proposed high capacity well that may have a significant environmental impact on a spring and that is a water supply for a public utility engaged in supplying water to or for the public, if the department determines that there is no other reasonable alternative location for a well and includes in the approval conditions, which may include conditions as to location, depth, pumping capacity, rate of flow, and ultimate use, that ensure that the environmental impact of the well is balanced by the public benefit of the well related to public health and safety.
- (e) All high capacity wells. 1. If s. 281.35 applies to a proposed high capacity well, the department shall include in the approval conditions that ensure that the high capacity well complies with s. 281.35.

 $T_{\theta}$ 

- 2. The department shall include in the approval for each high capacity well requirements that the owner identify the location of the high capacity well and submit an annual pumping report.
- (6) PREEXISTING HIGH CAPACITY WELLS. (a) The owner of a high capacity well for which the department issued an approval under s. 281.17 (1), 2001 stats., shall provide to the department information concerning the location of the well and an annual pumping report.
- (b) The department shall promulgate rules specifying the date and method by which owners of high capacity wells shall comply with par. (a).
- (7) Modifying and rescinding approvals for high capacity wells. The department may modify or rescind the approval of a high capacity well issued under this section or under s. 281.17 (1), 2001 stats., in the high capacity well or the use of the high capacity well is not in conformance with standards or conditions applicable to the approval of the high capacity well.
- rules identifying class I and class the trout streams for the purposes of this section. The department shall identify as a class I trout stream a stream or portion of a stream with a self-sustaining population of trout. The department shall identify as a class II trout stream a stream or portion of a stream that contains a population of trout made up of one or more age groups, above the age one year, in sufficient numbers to indicate substantial survival from one year to the next but in which stocking is necessary to fully utilize the available trout habitat or to sustain the fishery. In the rules under this paragraph, the department shall identify any class I or class I trout stream that is a farm drainage ditch with no prior stream history.

(23

AAI

24

1	(b) The department shall create accurate images of groundwater protection
2	areas.
3	(c) A person who proposes to construct a high capacity well may request the
4	department to determine whether the proposed location of the high capacity well is
5	within a groundwater protection area.
6	(d) The department shall administer a program to mitigate the effects of wells
7	constructed before the effective date of this paragraph [revisor inserts date], that
8	are located in groundwater protection areas. Mitigation may include abandonment
2	of wells, replacement of wells at different locations, and management strategies.
10	Under the mitigation program, the department may order the owner of a well
11	constructed before the effective date of this paragraph [revisor inserts date], that
12	is located in a groundwater protection area to undertake mitigation but only if the
13	department provides funding for the full cost of the mitigation, except that full
14	funding is not required if the department is authorized under ch. 280 to require the
15	well to be abandoned because of issues regarding public health.
16	(9) GROUNDWATER MANAGEMENT AREAS. (a) The department shall, by rule,
17	designate 2 groundwater management areas including and surrounding Brown
18	County and Waukesha County consisting of the entire area of each city, village, and
19	town at least a portion of which is within the area in which, on the effective date of
20	this paragraph [revisor inserts date], the groundwater potentiometric surface has
21	been reduced 150 feet or more from the level at which the potentiometric surface
22	would be if no groundwater had been pumped.
23	(b) The department shall assist local governmental units and regional

planning commissions in groundwater management areas designated under par. (a)

1	by providing advice, incentives, and funding for research and planning related to
2	groundwater management.
3	(c) If the groundwater quantity committee created under 2003 Wisconsin Act
4	(this act), section 15 (2) (b) does not issue the report under 2003 Wisconsin Act
5	(this act), section 15 (2) (e) by January 1, 2007, the department shall promulgate
6	rules using its authority under ss. $281.12(1)$ and $281.35$ to address the management
/ N	of groundwater in groundwater management areas.
)8/	(10) RESEARCH AND MONITORING. To aid in the administration of this section the
A921	department shall, with the advice of the groundwater coordinating council, conduct
10	monitoring and research related to all of the following:
11	(a) Interaction of groundwater and surface water.
12	(b) Characterization of groundwater resources.
13	(c) Strategies for managing water.
14	SECTION 8. 281.35 (1) (a) of the statutes is amended to read:
15	281.35 (1) (a) "Approval" means a permit issued under s. 30.18 or an approval
16	under s. 281.17 (1), 2001 stats., or s. 281.34 or 281.41.
17	SECTION 9. 281.35 (1) (b) 2. of the statutes is amended to read:
18	281.35 (1) (b) 2. If subd. 1. does not apply, the highest average daily water loss
19	over any 30-day period that is reported to the department or the public service
20	commission under sub. (3) (c) or s. 30.18 (6) (c), 196.98, 281.17 (1) 281.34, or 281.41
21	or s. 281.17 (1), 2001 stats.
22	SECTION 10. 281.35 (4) (a) 2. of the statutes is amended to read:
23	281.35 (4) (a) 2. A person who is operating a well under an approval issued
24	under s. 281.17 (1) or who is required to obtain an approval under that paragraph

before constructing or installing a well, 2001 stats.

25

25

1	SECTION 11. 281.35 (4) (a) 2m. of the statutes is created to read:
2	281.35 (4) (a) 2m. A person who is operating a well under an approval issued
3	under s. 281.34 or who is required to obtain an approval under that section before
4	constructing a well.
5	Section 12. 281.35 (4) (b) (intro.) of the statutes is amended to read:
6	281.35 (4) (b) (intro.) Before any person specified in par. (a) may begin a new
7	withdrawal or increase the amount of an existing withdrawal, the person shall apply
8	to the department under s. $30.18$ , $\frac{281.17}{(1)}$ $\frac{281.34}{(1)}$ , or $281.41$ for a new approval or
9	a modification of its existing approval if either of the following conditions applies:
10	Section 13. 293.65 (3) of the statutes is amended to read:
11	293.65 (3) WITHDRAWAL OF GROUNDWATER; DEWATERING; PERMIT REQUIREMENTS. (a)
12	An approval under s. 281.17 (1) 281.34 is required to withdraw groundwater or to
13	dewater mines if the capacity and rate of withdrawal of all wells involved in the
14	withdrawal of groundwater or the dewatering of mines exceeds 100,000 gallons each
15	day. A permit under s. 283.31 is required to discharge pollutants resulting from the
16	dewatering of mines.
17	(b) The department may not issue an approval under s. $281.17(1)281.34$ if the
18	withdrawal of groundwater for prospecting or mining purposes or the dewatering of
19	mines will result in the unreasonable detriment of public or private water supplies
20	or the unreasonable detriment of public rights in the waters of the state. No
21	withdrawal of groundwater or dewatering of mines may be made to the unreasonable
22	detriment of public or private water supplies or the unreasonable detriment of public
23	rights in the waters of the state.
24	SECTION 14. 299.05 (2) (b) of the statutes is amended to read:

299.05 (2) (b) Approvals under s. 281.17 (1) 281.34.

1 Section 15. Nonstatutory provisions. (1) Position Authorizations. The authorized FTE positions for the department 3 of natural resources are increased by 5.0 PR positions on July 1, 2004, to be funded from the appropriation under section 20.370 (4) (cg) of the statutes, as created by this 4 act, for groundwater quantity management) (2) GROUNDWATER QUANTY COMMITTEE. B 7 (a) In this subsection: 1. "Groundwater protection area" has the meaning given in section 281.34 (1) 8 9 (a) of the statutes, as created by this act. 2. "High capacity well" has the meaning given in section 281.34 (1) (b) of the 10 11 statutes, as created by this act. 12 3. "Local governmental unit" has the meaning given in section 281.34 (1) (c) of 13 the statutes, as created by this act. 4. "Spring" has the meaning given in section 281.34 (1) (f) of the statutes, as 14 15 created by this act. 5. "Water loss" has the meaning given in section 281.34 (1) (g) of the statutes 16 advisor" 17 as created by this act. (b) There is created a groundwater quantity committee consisting of the 78L 19 following members: 20 1. Four persons appointed by the governor. 21 2. Four persons appointed by the speaker of the assembly. 22 3. Four persons appointed by the majority leader of the senate. 4. The secretary of natural resources or the secretary's designee. (c) Each appointing authority under paragraph (b) 3. shall appoint one member representing each of the following interests:

4. Municipal.

(d) The speaker of the assembly and the majority leader of the senate shall each designate one appointee as cochairperson of the groundwater quarkty committee.

- (e) No later than December 31, 2006, the groundwater quantity committee shall report to the standing committees of the legislature with jurisdiction over environmental matters, in the manner provided in section 13.172 (3) of the statutes, recommendations for legislation to address the management of groundwater in the following areas, and administrative rules to implement the legislation:
- 1. Groundwater management areas, as designated under section  $281.34\ (9)\ (a)$  of the statutes, as created by this act.
- 2. Other areas of the state in which the withdrawal of groundwater over the long term adversely affects the availability of water for use or adversely affects water quality due to the effects of drawdown of the groundwater and in which there is a need for a coordinated response among the state, local governmental units, regional planning commissions, and public and private users of groundwater to address the effects on groundwater availability or quality.
- (f) The groundwater quantity committee shall recommend under paragraph (e) a coordinated strategy for addressing groundwater management issues by affected local governmental units and regional planning commissions with the assistance of the department of natural resources and other state agencies. The committee shall consult with affected local governmental units in the preparation of the recommendations under paragraph (e).

(g) The groundwater quantity/committee shall review the implementation of section 281.34 of the statutes, as created by this act. No later than December 31, 2007, the groundwater quantity committee shall report to the standing committees of the legislature with jurisdiction over environmental matters, in the manner provided in section 13.172 (3) of the statutes, the results of this review and the committee's recommendations for changes in the regulation of high capacity wells that are in groundwater protection areas, that have a water loss of 95 percent or more, or that have a significant environmental impact on a spring. The committee shall include in the report recommendations for statutory authorization for groundwater management strategies that permit adaptation of the regulation of high capacity wells as relevant information becomes available or groundwater conditions change.

(h) The department of natural resources shall staff and provide funding for the groundwater quantity committee.

- (i) The groundwater quartity committee terminates on December 31, 2007.
- (3) IDENTIFICATION OF GROUNDWATER PROTECTION AREAS. Notwithstanding section 281.34 (1) (a) 3. of the statutes, as created by this act, until the effective date of the rules promulgated under section 281.34 (8) (a) of the statutes, as created by this act, or the first day of the 19th month beginning after the effective date of this subsection, whichever is later, the department shall identify which streams are class I and class II trout streams, other than class I or class II trout streams that are farm drainage

ditches with no prior stream history, for the purpose of identifying groundwater protection areas using sections NR 102.10 and 102.11, Wisconsin Administrative Code, the version of the department's publication Wisconsin Trout Streams

16-21 AA

published most re	ecently before	e the effective	date of	this s	subsection,	and	the
information availa	ble to the dep	artment conce	ning farr	n drai:	nage ditche	S.	

## SECTION 16. Initial applicability.

(1) High capacity wells. The treatment of sections 281.17 (1) and 281.34 (2) of the statutes first applies to an application for approval of a high capacity well that is received by the department of natural resources on the day after the effective date of this subsection.
